## WORK EXPERIENCE

**DOT MATRIX DESIGN GROUP INC.**  
FULL-STACK DEVELOPER

**MORRISTOWN, NJ**  
07/2022 - PRESENT

- Created custom plugins, templates, and functions for WordPress-based websites.
- Designed and developed an email autoresponder plugin using PHP from scratch.
- Built and customized Shopify stores, implementing unique functionalities to meet client needs.
- Developed a Shopify app using the MERN stack to manage wholesale applications.
- Utilized data scraping techniques to efficiently migrate products from Weebly to Shopify.
- Created HTML email templates and newsletters for email marketing campaigns.
- Sketched wireframes and interactive prototypes using Adobe XD.
- Executed WordPress database migrations seamlessly with high precision.
- Built interactive 3D animations using Three.js to enhance user engagement on web projects.
- Implemented API integrations to streamline data flow between platforms.
- Optimized website performance by refining front-end code and implementing best practices.
- Collaborated with the design team to ensure cohesive and effective project delivery.
- Enhanced website accessibility by implementing WCAG guidelines, improving usability for all users.

**REPERFECTION**  
FRONT-END DEVELOPER

**FEZ, MA**  
09/2018 - 06/2021

- Created responsive and visually engaging landing pages tailored for user experience and performance.
- Delivered front-end solutions across diverse projects, focusing on usability and functionality.
- Managed and updated client websites regularly to maintain optimal performance.
- Ensured consistent user experience by conducting thorough cross-browser testing.
- Built interactive web elements, including sliders and animations, using HTML, CSS, and JavaScript.
- Optimized loading times and performance by refining assets and minimizing code redundancy.
- Integrated SEO best practices into front-end development to improve site visibility and ranking.
- Conducted regular usability testing and gathered feedback to continuously enhance user experience.
